

# Blue Prism Training

## 1. Process Studio

1.1 Running a Process

1.2 Basic Skills

1.3 Process Validation

1.4 Decision Stage

1.5 Calculation Stage

1.6 Data Items

## 2. Process Flow

2.1 Circular Paths

2.2 Controlling Play

2.3 Set Next Stage

2.4 Breakpoints

2.5 Collections and Loops

2.6 Pages for Organisation

## 3. Inputs and Outputs

3.1 Input Parameters

3.2 Stepping and Pages

3.3 Data Item Visibility

3.4 Data Types

3.5 Output Parameters

3.6 Start Up Parameters

3.7 Control Room

3.8 Process outputs

## **4. Object Studio**

4.1 Creating a Business Object

4.2 Application Modeller

4.3 Spying Elements

4.4 Attributes

4.5 Attribute Selection

4.6 Launch

4.7 Wait

4.8 Timeouts

4.9 Terminate

4.10 Write

4.11 Press

4.12 Attach and Detach

4.13 Read

4.14 Actions

4.15 Action Inputs and Outputs

4.16 Data Items as inputs

## **5 Error Management**

5.1 Recover and Resume

5.2 Recover and Resume

5.3 Throwing Exceptions

5.4 Preserving the current exception

5.5 Exception Bubbling

5.6 Exception Blocks

## **6 Case Management**

6.1 Work Queues

6.2 Queue Items

6.3 Work Queue Configuration

## **7 Additional Features**

7.1 Collection Actions

7.2 Choice Stage

7.3 Logging

7.4 Log Viewer

7.5 System Manager

7.6 Process Grouping

7.7 Export and Import

7.8 Release Manager – Packages and Releases

## **8 Advanced Features**

8.1 Data Item Initialisation

8.2 Data Item Exposure (Environment Variables)

8.3 Casting

8.4 Code Stage

8.5 Initialise and Cleanup

8.6 Attribute Match Types

8.7 Dynamic Attributes

8.8 Active Accessibility

8.9 Global Clicks and Keys

8.10 Credentials
